

Bio-Blend Fuels

The Biodiesel For You.

Bio-Blend Fuels, Inc. was founded in 2005 from a personal need to locate an alternative to the dependence and environmental impacts of conventional diesel fuels.

The plant is located at 2817 Basswood Drive, Manitowoc, WI 54220, which provides Bio-Blend Fuels with nearby freeway access and we are located on a truck route. With these resources Bio-Blend Fuels can ship inbound and outbound by truck anywhere in the United States, Canada and Mexico.

At a 2,600,000 gallon annual production capacity, Bio-Blend Fuels will be the largest operational facility in Wisconsin.

BIO-BLEND FUELS

Founded in 2005. The Diesel Fuel for You.

Production

Bio-Blend Fuels, Inc. produces B100 bio fuel and blends of bio diesel from beef tallow, #1 yellow grease, and vegetable oils. The plant has the capacity to produce 2,600,000 gallons of B100 annually. At that production capacity Bio-Blend Fuels, Inc. will be the largest production facility in Wisconsin. Bio-Blend Fuels, Inc. will be able to produce, market, and transport this quantity because of our excellent plant location.

Resources

The plant provides Bio-Blend Fuels, Inc. freeway and truck route access.

With these resources Bio-Blend Fuels, Inc. can transport inbound and outbound by truck anywhere in the United States, Canada and Mexico.

The Bio-Blend Fuels, Inc plant was specifically designed for mass production. Every element involved with our bio-diesel plant is customized in-house by our bio-diesel specialist.

Bio-Blend Fuels, Inc wants to help relieve the America's dependence on foreign oil.
